

Yevgeniy Yesilevskiy / Columbia

3. The Home Lab

Many students also received a 3D printer, which they could use to produce any additional tools or parts their projects called for.

4. The Results

Working in teams over Zoom, the students transformed the raw materials into inventions, ranging from water-testing systems to highly efficient rocket engines to medical devices.

This article appears in the Winter 2020-21 print issue of Columbia Magazine with the title "Lab in a Box."
